

DeskPack™

ArtiosCAD export plug-in for Adobe® Illustrator®

Export contours from Adobe® Illustrator® to native ArtiosCAD ARD workspace format

Esko's ArtiosCAD is the industry's most popular computer-aided packaging design (CAD) software. ArtiosCAD provides structural designers with a tool for conceptual design, product development and "live" prototypes. Until now CAD files could only be exchanged in file formats such as DXF, EPS, CFF2. Structural intelligence such as folding, animation, material, etc. was lost.

Until now, an EPS file had to be exported from Adobe® Illustrator® and opened in ArtiosCAD. After opening these files in ArtiosCAD line types needed to be assigned. The ArtiosCAD export plug-in allows users to write ArtiosCAD files or to paste Adobe® Illustrator® objects directly into ArtiosCAD, including their line type properties. These line type properties can be assigned in Adobe® Illustrator® by using the ArtiosCAD line type swatch library.

The ArtiosCAD export plug-in is available for both Mac and PC and can be downloaded at:
www.esko.com/ep/downloads.asp

DeskPack is an integrated part of Esko's complete packaging solution, the most advanced workflow environment for the packaging industry. DeskPack turns Adobe® Illustrator® and Adobe® Photoshop® into full-fledged design and prepress production tools.
